This course will cover the different types of neglect and the impact upon children who have experienced neglect, with a particular focus on cumulative harm. This interactive session will give practitioners the opportunity to use tools for assessment applied to a case study.

Learning Outcomes:

- To know what constitutes neglect and its impacts on children.
- To understand why neglect takes place and the contributing factors.
- To be able to recognise different types of neglect.

Target Audience:

Specific contact workforce: those who work directly with children, young people and family members on a regular basis, this may include visiting the family home. They will provide specific services and may be a regular contributor to the assessment and child planning process
